

## Job Description

# Quality Inspector

**2+ Yrs**

### About General Aeronautics:

At General Aeronautics (GA) we are passionate about flying objects! GA founders are pioneering aeronautical technologists, who believe in designing and building indigenous aerial vehicles. We are unwavering in leveraging tech to address complex social needs. We are currently focused on building unique solutions for the Agriculture, Medical and Logistics sectors.

### About the Role:

We are looking for a passionate and experienced individual to join us as a Quality inspector. Your main task for this role will be to establish and monitor the quality standards across the organization. As a Quality Inspector, you will be responsible for performing inspection activities of incoming parts and manufacturing process. Besides, drive continuous improvement in GA's products and processes. Additionally, provide technical guidance to the technicians.

### Key Purpose and Accountabilities:

Primary activities – Prepare and perform quality inspection for any incoming and outgoing parts of GA and maintain a record of their status.

### Major Duties:

- Perform incoming quality check, in-process inspection, and final inspection for drones and responsible to certify the quality of the parts.
- Responsible for maintaining the quality standards i.e., AS9100 and checking the process to their compliances.
- Assess all supplier product quality, and their performance, issue non-conformance if the product or process does not meet the requirements.
- Focus on quality activities to ensure compliance with business environment requirements and improve GA's product quality and system processes performance.
- Prepare ATP, perform inspection based on the ATP, check the route cards to ensure the activities are performed accordingly.
- If requested by the Quality Engineer, inspect the final products prior to delivery for conformity and certify and release products for delivery to customers
- Initiate, investigate and participate in corrective and preventative action plans to address product, process, and system non-conformances.
- Maintain all inspection documents and records, measuring and testing equipment calibration activities, MRB activity within GA

### Other Duties:

- Follow all relevant departmental policies, processes, and procedures so that work is carried out in a controlled and consistent manner while delivering a world-class product.
- Contribute to cost-efficient usage of all applicable resources to reduce wastage and unnecessary expense.
- Manage self and identify opportunities to take part in change initiatives, programs and projects that reflect international best practices and changes in the competitive environment.
- Adhere to all relevant QHSSE procedures, instructions, and controls so that GA provides a safe, world-class, secure and environmentally responsible service to customers, the public and its own people.
- Identify opportunities to drive continuous improvement in one's scope of the area.

### Experience, qualifications, skills required:

- Diploma/Degree in engineering
- 2+ years' relevant experience
- Experience in Inspections, ATP, IQC, OQC, Internal Audit, Supplier Audit, NCR, RCA, SCAR, CAPA and QC Tools.
- Handling measuring instruments, inspection templates, harnesses, electronic devices, composite materials, and metal components.
- Excellent communication skills and technical presentation skills for group and one-on-one presentations
- Proficiency in Cloud-based ERP and Microsoft Tools.

### Other Requirements:

- Travel: 20% of work required travelling
- Physically able to independently lift and move 25-30kg of instruments, using appropriate tools.
