

Job Description

Software Tester

General Aeronautics specializes in Drone / Unmanned Aerial Vehicle development & deployment for agriculture, medical and defence use cases. General Aeronautics was established to address aircraft design in all its aspects from a comprehensive system-level perspective. The General Aeronautics team is comprised of highly experienced members with many decades of expertise in industry and R&D organizations internationally.

General Aeronautics is looking for an Software Tester responsible for the development and maintenance of applications aimed at a vast number of diverse applications. Your primary focus will be the development of Server side services and their integration with front-end services. You will be working along-side other engineers and developers working on different layers of the infrastructure. Commitment to collaborative problem solving, sophisticated design, and creating quality products is essential.

Responsibilities

- Review and analyze system specifications
- Collaborate with Development Team to develop effective strategies and test plans for both Web and Mobile
- Build and Execute test cases (manual or automated) and analyze results
- Evaluate product code according to specifications
- Create logs to document testing phases and defects
- Report bugs and errors to development teams
- Help troubleshoot issues
- Conduct post-release/ post-implementation testing
- Work with cross-functional teams to ensure quality throughout the software development lifecycle

Skills

- Proven experience as a Quality Assurance Tester or similar role
- Experience in QA methodology
- Knowledge of Functional and Integration Testing
- Familiarity with Agile frameworks and regression testing is a plus
- Familiarity with Automation is a plus
- Ability to document and troubleshoot errors
- Working knowledge of Selenium, qTest, Zephyr and SQL
- Excellent communication skills
- Attention to detail
- Analytical mind and problem-solving aptitude
- Positive Testing mentality

Education

- B Tech / M Tech in Computer Science, Engineering or a related subject.
